

Inventory API Guide

In order to access the public API, you must be a registered user of the Inventory system, which can be achieved by signing in with your Duke University NetID or by contacting an administrator to create an account for you.

Once you have registered your account, you must acquire an API token, which can be generated or retrieved at <https://colab-sbx-379.oit.duke.edu/token/>.

You can then use your API token to make calls to the Inventory ReST API. An example call using curl is as follows:

```
curl -X GET -H "Authorization: Token <insert API token>"  
https://colab-sbx-379.oit.duke.edu/<insert API url suffix>
```

You can explore the available URL suffixes at <https://colab-sbx-379.oit.duke.edu/api/>.
